The Steroid Hormones and Receptors in Health and Disease Conference

Organizer Bio: Eric Prossnitz, PhD

Distinguished Professor and Chief, Division of Molecular Medicine, University of New Mexico, and Maralyn S. Budke Endowed Chair in Cancer Chemical Biology and Therapeutics, UNM Comprehensive Cancer Center, Albuquerque, USA

Dr. Prossnitz is a molecular and cellular biologist and physiologist interested in the distinct rapid and genomic actions of estrogen mediated by GPER and the classical nuclear receptors. His drug discovery efforts have led to the development of receptor-selective drugs that may find clinical application in cancer, obesity, and diabetes.
