The Liver Biology Conference: Fundamental Mechanisms and Translational Applications

Organizer Bio: Lars Zender, MD

Professor, Director and Chair, Medical Oncology & Pulmonology, University Department of Medicine, University Hospital Tübingen, Germany

Dr. Zender's research program focuses on the three areas of: 1) hepatocellular carcinoma; 2) senescence surveillance; and 3) functional target discovery. His group has demonstrated that activation of senescence prevents the formation of tumors from premalignant liver cells, providing a protective mechanism and possibilities for the development and improvement of treatment methods.
