## The Hematologic Malignancies Conference

---

### **Organizer Bio: Michael G. Kharas, PhD**

*Associate Investigator, Memorial Sloan-Kettering Cancer Center, New York, USA*

Michael G. Kharas is an expert in the mechanisms of normal and leukemic hematopoiesis. He is particularly interested in how RNA regulators control cell fate and has developed technologies to uncover new RNA regulators that modulate self renewal, cell fate decisions and differentiation in leukemia. Dr. Kharas is also working on charting the commonalities and differences between leukemic cells and hematopoietic stem cells and developing small molecule drugs to target leukemic pathways.
