The Epigenome in Human Health and Diseases Conference

Organizer Bio: Natacha Dreumont, PhD

Associate Professor, Biochemistry, Faculty of Pharmaceutical Sciences, and Senior Researcher, NGERE (Nutrition, Genetics and Exposure to Environmental Risks), Inserm, Université de Lorraine, Vandoeuvre-les-Nancy, France

Dreumont's research focuses on how environmental cues modulate RNA processing and how this could contribute to complex diseases. She is particularly interested in the effects of some micronutrients' deficiency on mRNA methylation and regulation of gene expression by miRNAs.
