

[Guillermo Barreto](#) is a biologist (summa cum laude) with a PhD (magna cum laude) in Developmental Biology. After a Postdoc at the German Cancer Research Center (DKFZ), he became in 2010 an independent Research Group Leader at the Max Planck Institute for Heart and Lung Research. Since 2021, he was recruited by the CNRS as Director of Research and joined the IMoPA at the University of Lorraine. His research is centered on epigenetic mechanisms during embryonic development that are recapitulated in several lung diseases.
