We know that attending the [IAC National Conference](#) is important and we strive to provide convenient housing options at competitive rates. IAC is pleased to offer comfortable accommodations near the convention center so our members can take full advantage of everything the IAC Convention has to offer. Booking a hotel room at an IAC hotel is important because both our attendees and the association benefit.

- **Book Early!!** IAC's hotel block will fill up quickly.
- IAC is able to negotiate lower room rates due the quantity of rooms required to accommodate our Convention participants. We have a selection of quality hotels that offer competitive rates, proximity to the Convention Center and various price points to accommodate participants on any budget.
- Our hotel contracts include clauses that protect you. Booking a room through IAC allows us the opportunity to provide assistance if problems arise with your reservation. Please note, we are unable to help attendees who make reservations at a hotel that is not in the official housing block.
- Once IAC's room block fills up, reserving a room at these hotels will be considered outside the IAC block and subject to the hotel's offered rates and terms. Ultimately, you are responsible for the terms and conditions of your reservation, including cancellation and payment terms. If you make a reservation outside of the IAC block, even if it is at a hotel offering IAC rooms, we will be unable to assist in securing a lower room rate should your rate be higher than the IAC rate. Please be certain you are booking within the IAC block when you make your reservation and, if you do not, be sure to understand the hotel's reservation terms and conditions.
- Booking within the IAC hotel block also allows us to secure competitive rates when negotiating with hotels in future Convention cities. Establishing a history of filling our room block helps IAC demonstrate that the association meets its obligations with hotels. In turn, this provides assurance to hotels that contract with IAC will be mutually agreeable.
