18:20-18:30

Closing by MEP Hosts, MEP Group for Kidney Health

18:30-20:30

Networking cocktail & Dinner in the Members' Salon

EKHA is a common effort by stakeholders to propose solutions for the challenges of Chronic Kidney Disease in Europe through effective prevention and a more efficient care pathway intended to facilitate the provision of appropriate and affordable treatment to all Europeans equally, while promoting the highest quality of care. EKHA works on the principle that the issue of kidney health and disease must be considered at European level and that both the European Commission and European Parliament have vital roles to play in assisting national governments with these challenges.
